

Lightning Safety

1

Before a storm comes, take shelter in a sturdy building.

2

Unplug appliances and do not use the telephone.

3

Do not take a bath or shower.

4

Stay away from tall objects — trees, fences, power lines.

5

Avoid natural lightning rods — golf clubs, fishing rods, bicycles, camping equipment.

6

If no shelter nearby, get in car and roll up windows.

7

If in the woods, make yourself into a small ball.

8

Get out of the water and go to shelter.

9

Watch your pager for information when safe to come out.
